ABOUT THE PROGRAM

This comprehensive program is designed to introduce clinicians to the versatile applications of diode laser technology in everyday dental procedures. This program aims to enhance clinical outcomes through minimally invasive techniques that improves precision in soft tissue management. Participants will explore and gain hands-on experience and theoretical insights into procedures such as gingivectomy, frenectomy, depigmentation, and flap management. Emphasizing safety protocols and case selection, the course bridges scientific principles with practical execution, empowering dental professionals to integrate laser dentistry confidently into their clinical repertoire.
